PROFESSIONAL SUMMARY

Computer Science student at FAST-NUCES Islamabad (4th semester) with high-level proficiency in C++ and systems-level programming, complemented by skills in Java, SQL, and Database Architecture. Experienced in translating concepts into functional applications, ranging from Node.js desktop tools to Dart-based mobile apps integrated with Google APIs. Brings a background in conventional art and UI/UX design to technical problem-solving. Proactive learner currently exploring AI and emerging technologies, seeking to contribute development skills and creative intuition to a professional internship.

SKILLS

- **Languages:** C++ (Advanced, FAST-NUCES standards), C, Java, SQL, Python, Dart, Node.js
- **Core CS Competencies:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Operating System Kernels, Computer Organization & Assembly Language (COAL), Software Design & Analysis (SDA), Databases
- **Databases & Backend:** SQL Server, Firebase (Real-time DB & Auth), PHP, Database Schema Design (ERDs), Normalization, Power BI, MS Excel, MS Access
- Work Coordination, Report Writing, Strategic Planning
- **Developer Tools & Frameworks:** Git/GitHub, Flutter (Dart), Google API, Ollama (LLM Integration), Linux/Ubuntu, VS Code, Eclipse, Docker, XAMPP, Visual Studio Tools
- **Design & Creative Skills:** UI/UX Design (User Interface Design for Games and Mobile Apps, Prototyping); Canva (Advanced); Adobe Illustrator (Basics); Conventional Art & Sketching translated into digital aesthetic intuition

WORK EXPERIENCE

Speed Programming - Officer, 02/2025 - 05/2026

NaSCon — Fast Nuces Islamabad

- Oversees and managed the smooth execution of speed programming contests, ensuring standard guidelines were followed by hundreds of participants.
- Acted as the primary point of contact during competitions, rapidly troubleshooting platform issues and assisting participants to ensure zero downtime.

Teaching Assistant Volunteer, 08/2025 - 12/2025

Pheli Kiran Schools — Islamabad, Pakistan

- Voluntarily taught core subjects to underprivileged children, adapting complex concepts into simple, engaging lessons to bridge educational gaps.
- Managed classrooms of diverse learning speeds, building a supportive environment that boosted student confidence and encouraged continuous learning.

Finance Team Member, 09/2024 - 06/2025

Fast Adventure Society — Fast Nukes, Islamabad

- Assisted in processing financial transactions and maintaining accurate records.
- Oversaw financial tracking and budget allocation for society events, ensuring optimal use of funds and full financial accountability.
- Maintained accurate financial records and generated post-event expense reports, sharpening the analytical and goal-oriented mindset needed to track operational progress.

PR Team Member, 09/2024 - 06/2025

Fast Computing Society — Fast Nukes Islamabad

- Spearheaded public relations and outreach campaigns to effectively engage large student audiences, significantly boosting event attendance and society visibility.
- Managed communication channels and pitched promotional ideas, collaborating with cross-functional teams to strengthen brand presence for society.
- Worked alongside team members to meet deadlines for project deliverables.

EDUCATION

BS: Computer Science, Expected in 01/2028

FAST-NUCES — Islamabad, Pakistan

Matriculation & FSc: 01/2024

FPGC College — Rawalpindi, Punjab, Pakistan

PROJECTS

- **Games:** Super Sonic (OOP Project), Chrono Rift (OS Project), Super Mario (COAL Project), Buzz Bombers (PF Project)
- **City Planning System** (Data Structures Project), **City Management System** (AI Project)
- **Synthex | AI-Integrated Educational Game** — Developed a Java-based platform featuring a hybrid SQL Server/Firebase architecture for real-time leaderboards and coding challenges. Integrated local Ollama AI to generate dynamic tasks within a custom Unity interface.
- **Hospital Management System** — Architected a full-stack system using PHP and SQL Server, managing the complete development lifecycle from database design to frontend integration.
- Self-directed developer with a focus on rapid prototyping; engineered a geolocation app in Dart using Google Maps API for quiet spots in the city and an aesthetic desktop journal via Node.js.

LANGUAGES & INTERESTS

Languages: English, Urdu, Japanese (Elementary, currently learning via Duolingo)

Interests: Game Development, Conventional Art, Database Handling, Frontend & Backend Development, Marketing
